

HOW TO

# Download a Zcash wallet

Digital wallet apps allow you to conveniently store your ZEC and send it to people and businesses.

There are different types of wallets: hardware, desktop and mobile, to name a few. So be sure to choose a wallet that will provide the mobility and security you need.

Keep in mind, your wallet is like your bank account, so take extra precautions with your passwords, and be sure to perform regular backups to protect your money.

Most wallets are free to download, so don't be afraid to try more than one, experimenting with small amounts, before committing.

To get started with **Zingo!**, a mobile wallet app for Zcash, start at your app store.

1

2

3

Search for *Zingo!* in your app store (Android or iOS), and download the app.

Open your Zingo! app and select *Create New Wallet*.

You will be given a seed phrase. **It's very important to write it down and secure it.\***

\*This is the only way to restore your wallet (and your funds) if you lose your phone, or want to use these funds in a different app, for example.

**I HAVE SAVED THE SEED**

After you are certain your seed phrase is saved securely, click on *I Have Saved the Seed*. Now you are ready to receive ZEC or transfer ZEC to your Zingo! wallet app.
